| <ul style="list-style-type: none"><li>Developed responsive web applications using React.js, Tailwind CSS, and REST APIs.</li><li>Built SEO-friendly pages and reusable components to improve performance and user experience.</li><li>Collaborated with cross-functional teams to deliver scalable features, API integrations, and production-ready solutions.</li><li>Optimized application performance through code splitting, lazy loading, and responsive design techniques, resulting in faster page load times and improved user engagement.</li><li>Implemented reusable UI components and maintained scalable frontend architecture, reducing development time and improving code maintainability across projects.</li></ul> |                    |

## PROJECTS

### Chat-App [Live](#) | [GitHub](#)

- Developed a chat app allowing users to send and receive text messages in real-time using React and Socket.io.
- Implemented image sharing functionality, enabling users to send and receive images during chats.
- Integrated JWT authentication for secure user sign-up, sign-in, and logout features.
- Enabled profile management, allowing users to edit and update profile details, including username and profile picture.

### E-commerce [Live](#) | [GitHub](#)

- Built a responsive e-commerce website with product listing, filtering, and cart functionality.
- Implemented search and category filter features using React state management for dynamic updates.
- Integrated dynamic pricing to adjust product costs based on sales and promotions.
- Enhanced UI with modern styling and responsive design using Tailwind CSS.
- Optimized performance and usability for a smooth shopping experience across devices.
